WORK EXPERIENCE:

BOSTON IT SOLUTIONS INDIA PVT.LTD. (INTERN)

FEB-2023 to MAY-2023

| BANGALORE, KARNATAKA

1. **Developed and Implemented Advanced Stock Prediction Model:** Spearheaded the design and implementation of a robust stock price prediction system utilizing a CNN-LSTM algorithm. Overcame the vanishing gradient problem through LSTM architecture, ensuring effective long-term pattern recognition.
2. **Mitigated Overfitting with Dropout Techniques:** Implemented dropout techniques to prevent overfitting, enhancing the model's generalization capability. This strategy ensured the accuracy and reliability of predictions by avoiding the incorporation of noise and irrelevant features.

PROJECTS:

"Healthcare app".

Empowering health monitoring through real-time alerts and personalized recommendations. Easily book appointments, track vital stats, and receive tailored advice for optimal well-being. Seamlessly store and access health records for comprehensive care management."

"Restaurant Management System".

This HTML, CSS, and JavaScript code creates a visually appealing and functional Restaurant Management System interface. It efficiently organizes orders, reservations, and menus, enhancing restaurant operations. With smooth transitions and intuitive design, it offers seamless navigation for both restaurant staff and customers.

"Real Time Chat Application".

This HTML, CSS, and JavaScript code constitutes a real-time chat application allowing seamless communication between users. The interface is designed with responsive CSS for optimal display, while JavaScript powers the chat functionality, including message generation and replies.

"Recipe Book ".

This HTML, CSS, and JavaScript code creates a dynamic recipe book app where users can browse and search for recipes. The interface features responsive design, interactive search functionality, and animated recipe cards for an engaging user experience.
